PREDICT - TO - EARN

PROBLEMS THAT NEED TO BE SOLVED

POTENTIAL RISKS IN CENTRALIZED EXCHANGES (CEX)

Risks when the game is manipulated behind the scenes.

TRADING IS NOT EASY FOR BEGINNERS

For beginners, trading is not easy when there are a myriad of new terms and concepts, along with plenty of complex mechanisms to complete a trade.

LACK OF INFORMATION TRANSPARENCY

Audit information is not public, leading to confusion in the market.

|| MARKET POTENTIAL ||

Cryptocurrency's worldwide penetration (2020)

MARKET POTENTIAL

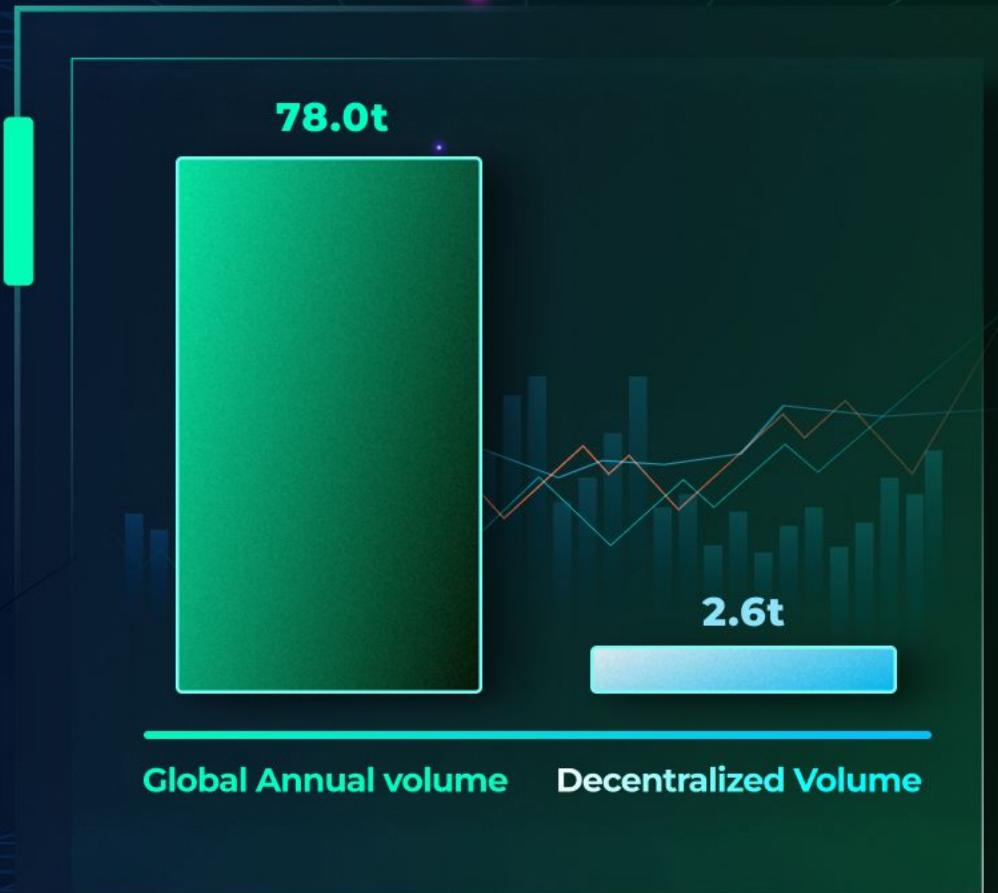

Cryptocurrency's annual transaction volume

GLOBAL ANNUAL VOLUME

Over \$78 Trillion in annual trading volume (worldwide)

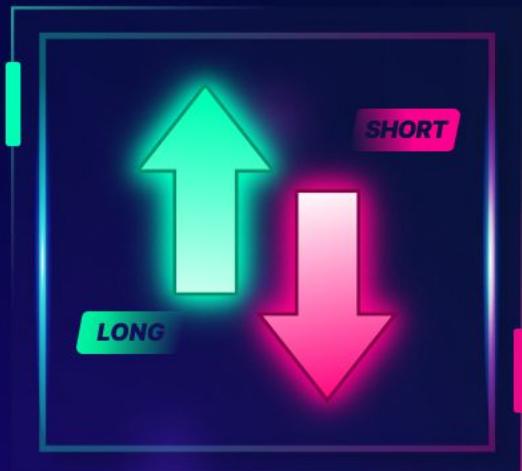

DECENTRALIZED EXCHANGES

Over \$2.6 Trillion in annual volume on decentralized exchanges

|| LS TRADE ||

We take **the best** of the market to create an **attractive**,
easy-to-use and **transparent exchange**

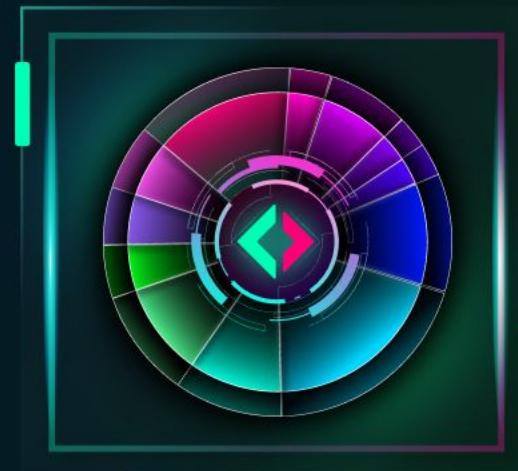

LONG/SHORT X

Entry mechanism is
simplified to the max

BITCOIN

Price is taken according to Bitcoin
via Oracle Chain Link

TOKENOMICS

Scientific tokenomics
mechanism to ensure the sustainable
development of tokens

lstrade.io

LONG SHORT X

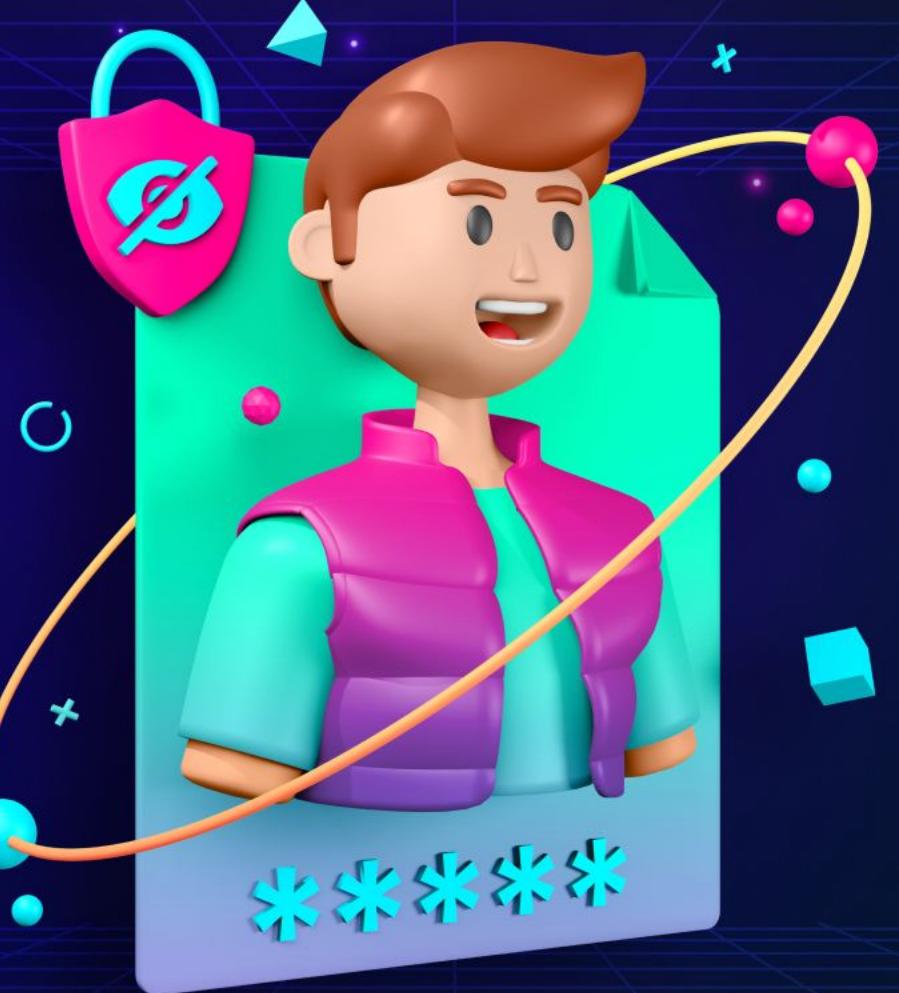

MISSION

Bringing a transparent trading platform
to the market.

VISION

Become the most used application
in the crypto market in the next 3 years

USER BENEFITS

USER PROTECTION

Bring an interesting, easy-to-join and transparent financial playing field

MANY ASSET TYPES WILL BE ISSUED

Promises to bring various types of products such as stocks, gold, oil... to LS TRADE ecosystem

MECHANISM

- At first, **Long Short X will take the price of Bitcoin (BTC)**. Many other fields and categories will be updated in the future.
- Price data will be crawled in real-time from Oracle Chain Link.**
- All information and data is managed by Smart Contract on BNB Chain (BEP-20).**
- All interaction with the contract requires a fee in BNB Coin.**
- To join, users need to **use a Defi Wallet** (Metamask, Trust, 3S, etc.). LSTRADE does **not keep the users' assets**.

|| LS TRADE ||

TRADE RULES

- There are 2 sides to trade: **Long or Short.**
- To participate in trading, you **use tickets** that are purchased with **BNB Coin (BEP-20)**
- 1 ticket = 0.01 BNB Coin.**
- Min order size: 1 ticket**
- Max order size: 100 tickets.**
Max order size will be increased at the appropriate time.

|| THE TRADING TIME ||

Note: During this period, users can't make new trades.

TRADING RESULTS

- ◆ Long side will be profitable if Bitcoin price is higher than at the time of investment.
- ◆ Short side will be profitable if Bitcoin price is lower than at the time of investment.
- ◆ Profit will be calculated based on the liquidity pool of 2 sides. Both sides will liquidate each other.
- ◆ The order fee is 5%.
- ◆ In the event that the returned Bitcoin price is unchanged (equal to at the time of investment), both sides will be returned 95% of the invested capital, the remaining 5% will be charged for the order fee.
- ◆ In case of network failure, the investment will be canceled, and the investment money will be refunded 100% to the investor.
- ◆ In case the long or short side has zero participants, the trading round will be canceled. The investment money is refunded 100% to the participants.

TOKEN DISTRIBUTION

98% Earning (Mining): 98.000.000

- Users will receive when trading on Long Short X

1.0% Seed sale: 1.000.000

- 1st: Release 40% after 120 days from the listing date
- After the 1st tranche, 15% will be released every 200 days (4 times)

0.5% MKT & Bounty: 500.000

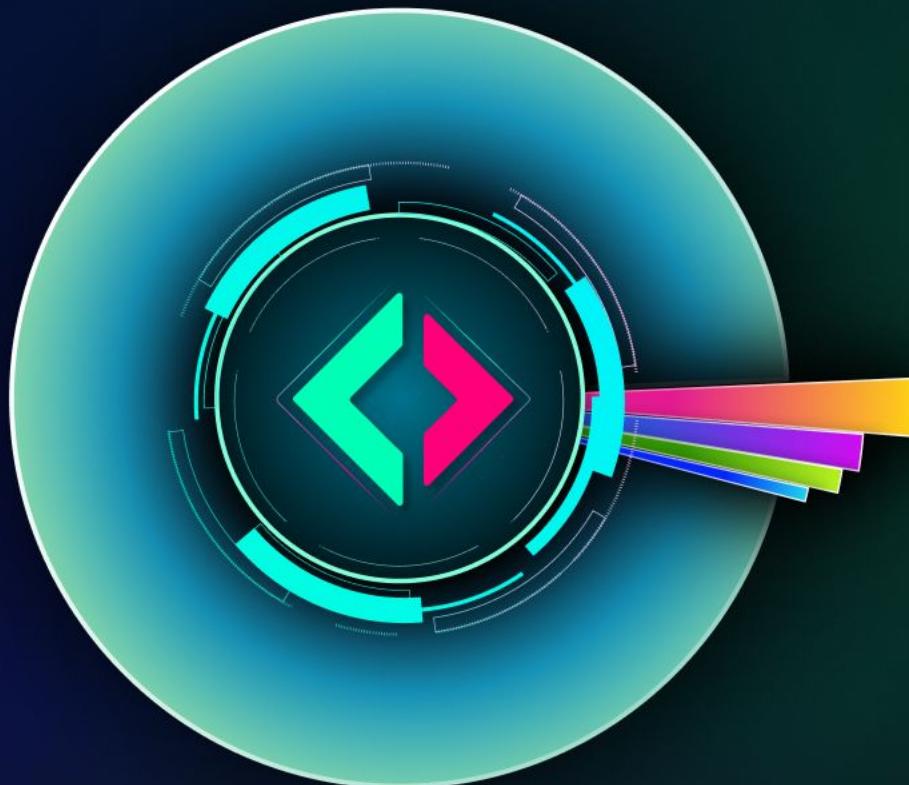

- After the listing date, 5% will be released every 30 days (20 times)

0.3% IDOs: 300.000

- TGE: 75%
- After listing date, 5% will be released every 30 days (5 times)

0.2% Liquidity: 200.000

- TGE: 100%

LS COIN OVERVIEW

Token Name:

LS Coin

Ticker:

LSC

Blockchain:

BNB Chain

Token Standard:

BEP-20

Total Supply:

100.000.000 LSC

Contract:

...

MINING LS COIN(LSC)

LSC has a total supply of 100.000.000.
Conditional minting. Specifically, for each round a fixed number of LSC will be minted, and will be equally distributed to participating wallets. (No matter winning, losing, or the order size, all the LSC will be equally distributed to participating wallets)

Each coin generation cycle lasts 400 days, and in each next cycle, the coins generated will be 35% less than the previous one.

In the first cycle, each round will have 78 LSC, equally distributed to both Long and Short sides - 39 LSC each.

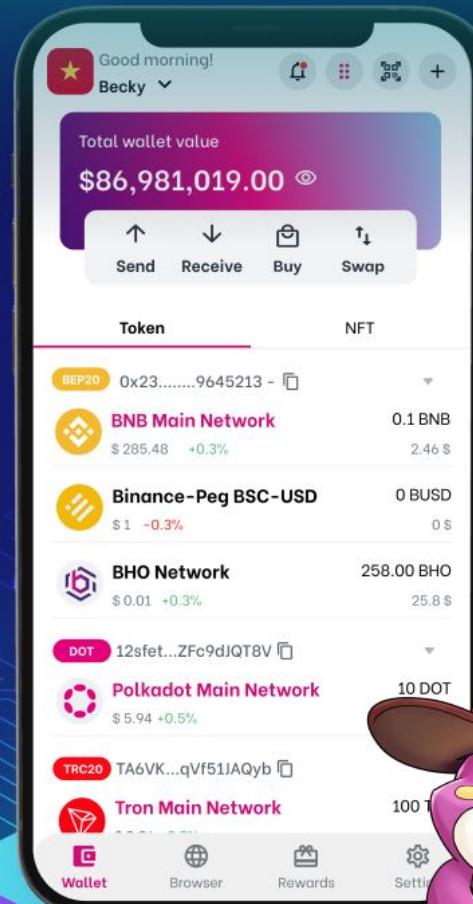

|| MINING TOOL ||

LS Trade partners with **3S Wallet** to provide a **user-support** toolkit when participating in **Long Short X**, so users can bring in regular profits while being hands-off.

At the same time, **3S Wallet** is a Defi wallet with **many essential features integrated for users**, bringing a simple **experience**, as well as keeping their **assets safe and secure**.

This is **consistent** with LS Trade's operation directives.

(The LS Coin deflationary cycle)

CYCLE	TRADING ROUNDS/DAY	DEFLATION RATE	COINS RECEIVED /ROUND	COINS MINTED IN 1 DAY	COIN MINTED IN A CYCLE (400 DAYS)	UNMINTED LSC AMOUNT
1	480		78	37,440	14,976,000	83,024,000
2	480	35%	51	24,336	9,734,400	73,289,600
3	480	35%	33	15,818	6,327,360	66,962,240
